

**Explore the Art of Photography and
The Wild Olympic Peninsula
April 6 - April 12, 2024**

Jagged snow-capped mountains, lush temperate rainforests with their cascading waterfalls, and a wild coast with beaches, sea stacks and magnificent sunsets – the Olympic Peninsula in Washington state is one of the most dramatic and diverse photographic locations in the USA. In this workshop we'll sample the best of the Peninsula, including lots of time in the Olympic National Park. It's the perfect setting for improving your skills and creativity with the camera and the digital darkroom. You'll come back with great images, new friends and enriched skills and knowledge.

Join Al DaValle and Mark Gardner to explore the Olympic Peninsula and the art of photography. This workshop is for anyone proficient with their camera system and the desire to become more artistic, creative and personally expressive in their photography. We hope that you'll join us for the exciting photographic adventure.
